CARBON SCHOOL DAMAGED BY FIRE WEDNESDAY LAST

The fire alarm sounded last Wednesday night about 8:30 p.m. for the first time in months and the scene of the fire was the Carbon school. In some way fire started just under the steps leading from the basement to the first floor and when the fire was noticed flames were shooting up the stairway. Shortly after the alarm was sounded a large crowd of spectators was on hand and with the aid of chemicals and a bucket brigade the fire was finally under control, but not before considerable damage was done. The terrific heat caused from the fire below broke all the windows in the hall from the basement to the top floor and the plaster on the walls is completely ruined. The varnish on the woodwork was all scorched and damage is estimated at about \$1,000.00. Fortunately the doors leading from the hallway to the rooms were closed and the smoke and heat damage was confined to the halls and basement. The loss is covered by insurance and work will be commenced immediately to repair the building.

As a result of the fire there was no school held on Thursday and Friday of last week, but on Monday the pupils were all back to their studies.

TOWN PLANNING IN ALBERTA

(By Horace L. Seymour)

Being a series of short articles explanatory of the provisions of The Alberta Town Planning Act and Regulations thereunder.

ARTICLE 4

HOUSING

One of the principal objects of town planning is to provide desirable home sites. Subdivision regulations and provisions of the Town Planning Act referred to in previous articles have been drafted to accomplish this end. A general regulation is that lots for residential purposes shall be at least 50 feet wide, at least 100 feet deep with a minimum area of 5000 square feet. In a new subdivision, stores and similar structures cannot be erected in a residential district or zone; adequate streets and lanes are to be provided. The thoughtless and indiscriminate placing of houses on unsubdivided lands without reference to existing or future development can now be curbed. But where there exists a proper community spirit such infractions of the "laws" of common sense, of community economy, will probably not be considered by intending purchasers or sanctioned by the owner. If, however, through thoughtlessness, through ignorance of existing legislation or regulations these infractions

occur, it may mean considerable extra expense to the owner to have necessary surveys subsequently made, or in other cases, to move buildings recently erected.

In general residences are to be erected but one to a lot, that lot forming part of a registered subdivision. Any further information may be obtained by writing to the office of the Director of Town Planning, Parliament Bldgs., Edmonton.

MRS. E. BRUCE DIES IN CALGARY

Mrs. R. C. Barr received word on Friday that her mother, Mrs. E. Bruce, had died at the home of her daughter, Mrs. Duncan MacDonald, 1409 Fifteenth St. W., Calgary.

The late Mrs. Bruce was born in Easington, England. She resided for a while at Guelph and Bright, Ontario, before moving west to take up her residence in Dog Pound, Alberta. In 1929 she moved from Dog Pound to Calgary. She was a prominent member of Grace Presbyterian Church in Calgary.

She leaves a son, Wilfred S. Petrie, of Windsor Ontario; two daughters, Mrs. R. C. Barr of Carbon, Alta., and Mrs. MacDonald of Calgary; a sister, Mrs. D. Egan of Philadelphia, Pa., and a brother, Robert Foster, of Ormo, Ont.

Funeral services for Mrs. Elizabeth Bruce, widow of the late Wm. Bruce, were held Monday afternoon from Armstrongs Funeral Home, Calgary. Rev. James McNeill officiating. Burial was made in the family plot in the Union cemetery.

"THE GREENE MURDER CASE" TO SHOW HERE THIS WEEK

"The Greene Murder Case" was a great murder mystery story but as a moving picture it is even more gripping, more exciting. The reason for this can be ascribed to the intelligent character portrayals furnished by the actors and the excellent direction of Frank Tuttle.

The plot has to do with the strange killings which occur in the Greene family's household. An elder son, his younger brother and then their mother succumb to the fiendish hand of an unknown murderer.

William Powell, as Philo Vance, is called in on the case by his friend of a former murder mystery film "The Canary Murder Case" E. H. Calvert, the district attorney. Working on the case with Powell is Eugene Pallette, the practical-minded and blundering comedy detective who was also one

TENNIS NOTES

CARBON WINS FROM HESKETH IN INTER-TOWN MATCH

The Carbon Lawn Tennis club received a visit from Hesketh on Sunday last. Hesketh had won on two occasions from Carbon but this time Carbon made a clean sweep, winning all the events played.

The following are the scores:

Men's Singles—Bruce Ramsay of Carbon defeated L. Brown of Hesketh 7-5; 6-2.

V. Hawkins of Carbon defeated R. Reed of Hesketh 6-0; 6-3.

Ladies' Singles—Miss Kate Ramsay of Carbon defeated Mrs. Brown of Hesketh 6-1; 6-1.

Men's Doubles—Bruce Ramsay and V. Hawkins of Carbon defeated L. Brown and T. Heath of Hesketh 6-8; 6-1; 6-2.

J. M. MacDonald and W. Poxon of Carbon defeated J. Neilson and L. Saunders of Hesketh 6-1; 6-2.

Ladies' Doubles—Misses E. Braisher and I. Nash of Carbon defeated Mrs. Brown and Mrs. Chapman of Hesketh 6-1; 6-1.

Mixed Doubles—L. Poxon and Mrs. Peters of Carbon defeated T. Heath and Mrs. Chapman of Hesketh 7-5; 6-2.

Final in Local Tournament

The Carbon Lawn Tennis club brought their club tournament to a close with the finals of the Ladies' Singles and Mixed Doubles. The following are the results:

Ladies' Singles—Semi-final—Mrs. Peters defeated Miss Braisher 6-5; 6-1. Miss K. Ramsay, a bye. In the final Mrs. Peters defeated Miss K. Ramsay 6-5; 6-2.

Mixed Doubles—In the final match Len Poxon and Miss K. Ramsay defeated W. Poxon and Miss Irene Nash 6-4; 6-2.

TENTH FORTNIGHTLY CROP REPORT

Threshing is again under way following a period of unsettled weather over a greater part of the province, which delayed operations to some extent. Southern districts report threshing 90 per cent completed with the exception of the irrigated areas where 50 per cent remains to be done. In Central and Northern parts threshing delays have been of frequent occurrence due to rains and the amount threshed varies from 5 per cent to 25 per cent.

Cutting of grain for threshing is completed. In some areas cutting of Green Feed is still in progress. This is particularly true of the east central part of the Province where a good crop of green feed is being cut on fields where the first crop was destroyed by high winds and drought. The absence of frost until late in the season has been a factor in greatly increasing yields of Grain and Feed in this area over early expectations.

Frost was general on the night of September 18th, but very little damage reported, due to the advanced state of maturity of the crop.

Threshers' returns indicate that the quality of wheat is high. The yield, according to these returns will be satisfactory and will be higher than was anticipated.

Harvest operations commenced in the Sugar Beet Area on September 17th. A good average yield with a high sugar content is reported.

Due to late rains, pasture and feed conditions are generally satisfactory and Live Stock in good condition.

of the figures in "The Canary Murder Case."

After a series of uncanny and thrilling events Powell solves the deep mystery with the suavity and super-intelligence that S. S. Van Dine wrote into this character in his novels. Powell's performance is flawless.

If you like your thrills dished up with machine-gun rapidity, if you like entertainment that keeps your pulses tingling, don't pass up "The Greene Murder Case," which will show at the Carbon Theatre on Friday and Saturday of this week. This film is one of the season's best.

FARMER IS CONFRONTED WITH TRYING CONDITIONS

No one can dispute that the farmer is a man sore beset by difficulties these days. With the price of wheat a wavering uncertainty of the future he must still get his crop off, hire his hands and pay his harvesting expenses. While he is able to secure labor more cheaply than in previous years, the bills still amount up. He has the responsibility of paying and feeding his men, taking his chance on the fu-

ture. No doubt he would infinitely prefer to pay higher wages, and be sure of higher prices for his grain. But he has to shave expenses, even while admitting that \$2.00 is not a good wage for the labor of stacking.

From the viewpoint of the laborers \$2.00 is not a wage that will permit them to put any substantial sum away for winter. If they have families, it will do no more than carry the families in the present months.

The fact is that both the farmer and the laborer are in unhappy position. Other commodities have not dropped in proportion to grain and livestock.

The farmer sells his cows at four and one half cents and buys them back over the block at from 25c to 30c. He sells wheat cheap, if at all, and buys bread for the same old price. No kind of wearing apparel has dropped in proportion to grain, neither have food-stuffs. There is little difference in the cost of feeding a harvest hand from two years ago. The only saving can be in wages.

If the buying power of \$2.00 was as great today as \$4.00 was two years ago, there would be no reason for complaint. But it is not. And the consequence is that the harvest laborer is being ground between the necessity of the farmer and the inclination of the manufacturer.

With the long continued drop in wheat, there should be some substantial corresponding reduction in other commodities. Unfortunately, such is not the case, and the situation presents serious economic unfairness.

To mention only one insignificant general purchase, tobacco, which, not a necessity, is a real solace, has maintained its relentless price, quite regardless of the fact that Canadian grown tobacco is now being used in factories and the tobacco farmers are not making wealth.

It is time that the mass of consumers received some adequate protection and that the price of wheat, served more nearly as a standard for other staples.—Exchange.

Empty Hours

William Lyon Phelps, professor of English literature at Yale University, has a thought-arresting article in one of the big United States magazines. He considers the character-revealing value of our leisure hours and the need of observing what we do with them if we are to have a real understanding of one another.

What does the average person do with his leisure? he asks. For, "except in the rare instances of creative work, it is leisure alone that reveals or betrays the man." Dr. Phelps goes even so far as to say that "the use of leisure eventually determines the fate of an entire community, or of an entire nation." He cites the fate of the Roman Empire, "destroyed, first, by too much leisure, second by the wrong use of it."

Throughout America nearly everybody works, if they can obtain employment, but the signs of the times seem certainly to indicate the coming of more leisure. Will the increased hours of leisure be empty or filled? And, if filled, what will be the character of their filling?

The writer, as a boy, worked ten hours a day, six days a week, at manual labor in a factory. There was little time for leisure, but he gained a portion of his education by snatching a couple of hours of study in the evenings. The 10-hour working day has passed. It faded away before organized labor's demand for "eight hours to work, eight hours to sleep, eight hours to do with as you like."

Now the 8-hour working day is gradually going into the discard. The growing demand of organized labor is for a 6-hour day and a five-day working week. It is contended that in this machine age, with the many mechanical marvels of today, one man, working much shorter hours, can produce more than it was possible for several men working longer hours to produce even a few short years ago. And it is true. And this development is given as one of the main causes of unemployment today. Hence, considerable force attaches to the demand for a shorter working day and fewer working days in order, if for no other reason, to provide work for a larger number of persons. Even on the farm, modern machinery is reducing the required number of hours and days of labor, and, consequently, in the number of men employed.

All this means increased hours of leisure. What are we going to do with them? Have you ever stopped to check up just what you now do with your leisure? "The real business of life is Life." Men and women live in their minds. If leisure means laziness, if leisure means only bodily pleasures, if leisure means only attendance at games and sentimental pictures, the mind stagnates and leisure becomes a detriment not an advantage, a curse rather than a blessing.

On the other hand if, by education and the increase of refinement, as Dr. Phelps says, men and women will make a profitable use of their increased leisure, the coming generations will be more civilized and more happy than at any previous period in their history.

It is within the compass of every person to become a "personality," to be in some degree different from others. The process is a mental one; the product the outgrowth of how the leisure hours are spent.

The happiest people, concludes Dr. Phelps, "are those who think the most interesting thoughts. Interesting thoughts live only in cultivated minds. Those who decide to use leisure as a means of mental development, who love good music, good books, good pictures, good plays at the theatre, good company, good conversation—what are they? They are the happiest people in the world; they are not only happy in themselves, they are the cause of happiness in others."

Telephones In Australia

**Can Now Carry On Conversation
Over Phone For Distance Of
3,000 Miles**

The Australian telephone and telegraph system, operated by the Commonwealth Postal Department, is being rapidly extended and within a few weeks it will be possible for Sydney people to speak to Perth by direct wire, a distance of more than 3,000 miles. A commercial radio telephone service between London, England, and any Australian capital is now in operation, and within a few months the Commonwealth Government intends to establish a similar service between the Island State of Tasmania and the other states of the Commonwealth.

No Place For Boys

**Poland Compels Citizens To Bathe
Once a Month**

It is reported in a Polish newspaper that a bill is now being drafted which will compel every Polish citizen to take a bath at least once a month. A bathroom in the house will be accepted as evidence that the residents make reasonable use of it, but those who have no bathroom of their own must carry bath cards which will have to be stamped monthly by an official as proof that a bath has been taken. Children under 10 and elderly people over 70, it is said, are to be excused.

Of the 26,000 oil wells dug last year, 8,000 returned no oil.

Reduce the Acid

Sick stomachs, sour stomachs and indigestion usually mean excess acid. The stomach nerves are over-stimulated. Too much acid makes the stomach and intestines sour. Alkali kills acid instantly. The best form is Phillips' Milk of Magnesia, because one harmless, tasteless dose neutralizes many times its volume in acid. Since its invention, 50 years ago, it has remained the standard with physicians everywhere.

Take a spoonful in water and your unhappy condition will probably end in five minutes. Then you will always know what to do. Crude and harmful methods will never appeal to you. Go prove this for your own sake. It may save a great many disagreeable hours.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

A Remarkable Feat

**Conversation From Airplane In
Flight Covered Fourteen
Thousand Miles**

From an aeroplane 5,000 feet over Buenos Aires, Captain Lewis Yancey recently talked by radiophone with Sydney, Australia, thus telephoning from an aeroplane in flight over a distance of 14,000 miles, says Popular Mechanics Magazine. His conversation went by radio to a radiotelephone station in Buenos Aires, then by radio to Madrid. At Madrid the conversation was transferred to land lines of a telephone company which took it to the French border, where it was transferred again to other land lines and carried to the English Channel. A submarine cable took it to England, then other land lines carried the words to a radiotelephone station at Rugby. From Rugby the beam wireless carried the words to Sydney. The conversation was quite distinct.—Moose Jaw Evening Times.

Backward Babies

**Thrive After Use Of Baby's Own
Tablets**

Derangements of the digestive organs are responsible for most of the ailments which afflict young children and keep them backward in development. Baby's Own Tablets regulate the stomach and bowels restoring them to normal action and this is all that is necessary to set the little sufferer safely on the road to health and happiness.

Baby's Own Tablets are specially designed to correct indigestion, constipation, colic; break up colds and simple fevers and to allay teething pains. They are sold by medicine dealers or by mail at 25 cents a box from Dr. Williams' Medicine Co., Brockville, Ont.

**THE GREATNESS OF THE GOD-
FEARING**

Golden Text: "The fear of Jehovah is the beginning of wisdom: A good understanding have all they that do His commandments: His praise endureth forever."—Psalm 111:10.

Devotional Reading Psalm 8.

A Review By Means Of Allusions

In wonder-workings, or some bush aflame,
Men look for God and fancy Him concealed;
But in earth's common things He stands revealed,
While grass and flowers and stars spell out His name.

—Minot J. Savage.

So good a world—no rich, no poor, no gain nor loss, nor stint,
No pottage in it able to exclude a brother's birthright.

—Browning.

"He who makes and counts the stars said: 'Behold their number; even so shall thy children be through the ages.'"

I do not hope with David's harp to chase the evil spirits from the troubled breast.—Keble.

His life is the tragedy of a man capable of nobility of character and of great service, who gave loose reins to his evil temper till his only ambition was to hunt and kill a man whom he hated.

It is when the hour of conflict is over that history comes to a right understanding of strife, and is ready to exclaim, "Lo! God is here, and we knew it not!"

My lonely gourd is withered in an hour!
I droop, I faint beneath the scorching sun.

—Charlotte Elliott.

Moderns are largely forgetting how to walk. There are constantly fewer places where easy and comfortable transportation is not available. There is no incentive to walk, and we are losing the habit.

Painless and perfect in their action, Miller's Worm Powders are always a safe and reliable remedy for children who show symptoms of worms. These symptoms are easily recognizable in a feverish restlessness, frequently ending in convulsions. A point of notable importance is that after Miller's Worm Powders have expelled the worms, the stomach and bowels are toned up into a very healthy condition.

"What are you going to do to-night, dear?"

"Oh, write a letter or two, read a bit, listen to the wireless, and so on."

"Well, when you come to the 'sew on,' don't forget my shirt buttons."

Inhale Minard's Liniment for Asthma.

Serious Rectal Troubles Often Caused By Harsh Cathartics

**ENO'S
FRUIT SALT**

ENO is pleasant, gentle, safe and sure.

A daily dash of ENO'S "Fruit Salt" in a glass of water, morning or night, tones up and sweetens the entire system. Acid stomach, fatigue, biliousness, quickly disappear.

Manitoba Butter Leads

**Carried Off Lion's Share Of Prizes
At Toronto Exhibition**

Manitoba exhibitors led all other provinces in total point scoring and major awards for creamery butter shown at the Canadian National Exhibition.

While Ontario, Saskatchewan and Alberta shared in the prize awards, it was Manitoba that carried off the lion's share; being represented by winners in almost every classification of butter on exhibit.

Persian Balm appeals instantly to the dainty woman. Stimulating the skin, making it velvety soft in texture, it creates and preserves complexions of exquisite charm. Delicately fragrant. Cool and delightful to use. Especially recommended to soothe and dispel roughness or chafing. Stimulating and invigorating. Imparts a youthful loveliness and protects and enhances the most delicately-textured skin. Persian Balm is the unrivalled toilet requisite.

The man who won a big pool in a horse race had his name in the papers. The papers aren't big enough to publish the names of all the losers.

Make dresses bright as new!

DIAMOND DYES are easy to use; go on smoothly and evenly; NEW. Never a trace of that red-dyed look when Diamond Dyes are used. Just true, even, new colors that hold their own through the hardest wear and washing.

Diamond Dyes owe their superiority to the abundance of pure anilines they contain. Cost more to make. Surely. But you pay no more for them. All drug stores—15c.

Diamond Dyes

Highest Quality for 50 Years

Men outnumber women by about 9,000,000 in India, the male population of Calcutta alone being more than double the female.

Use Minard's Liniment for Foot Ailments.

A significant advance in aircraft is the use of a chemical cooling fluid in place of water.

WHOLE FAMILY HAD DYSENTERY

Dysentery is one of the worst forms of bowel complaint and should be checked at once as its termination often proves fatal.

Mrs. H. F. Stewart, Findlater, Sask., writes:—"Two years ago we were all very bad with attacks of dysentery. My husband got a bottle of Dr. Fowler's Extract of Wild Strawberry and after taking three or four doses we were completely relieved. Since then we have never been without a bottle of it in the house."

On the market for the past 85 years; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Don't Let Foods Stale

Foods that ordinarily stale quickly will stay fresh and tempting a surprisingly long time if you cover them with Para-Sani Heavy Waxed Paper.

Your grocer, druggist or stationer has Para-Sani in the handy, sanitary knife-edged carton. For those who prefer a lighter paper put up in sheet form ask for Appleford's "Centre Pull" Packs.

**URGENT NEED OF MORE
FIRE PROTECTION**

The fire at the school last Wednes-
day night has proved one thing to
the Village of Carbon and that is that
inadequate fire protection is main-
tained. When the hose reels were laid
out on Wednesday last it was found
that there was not sufficient hose to
reach from the water supply tank to
the school. Consequently the hose had
to be re-wound and laid from the
creek to the scene of the fire. Fortu-
nately the fire had smothered itself
to a certain extent and with the aid
of chemicals and water it was soon
under control and when the water
arrived it did not take much to make
sure that the flames were subdued.
Had this fire broken away, the entire
school would have been demolished
before the water was turned on.

What the Village of Carbon needs
and must have, is either more hose or
another water supply tank. Preferably
the latter, on account of the extra
water supply in the winter months
when the creek is frozen and there
is no water to be had. This tank, it
has been suggested, could be put un-
der the waiting room of the Curling
rink and during the summer months
the rains would always keep this tank
filled with water from the roof.

No matter what else is done, such
a storage tank should be constructed
immediately, before the winter sets in.
Were a fire to break out in the south
end of the town after freeze up, there
would be no fire protection for that
part of the town at all. Those citizens
are paying for the maintaining of the
Carbon fire department the same as
every other tax payer, and they are
entitled to the same protection. As it
is now, when the creek is frozen or
the water is not flowing, they have
no protection whatsoever.

The matter of additional fire pro-
tection is one for the Village council
to take in hand immediately, and we
would suggest that when the question
is discussed that due consideration be
given to the proposed water tank,
rather than the procuring of more
hose to reach from one end of the
town to the other. The new tank is
the proper procedure on account of
the extra water storage facilities, and
the construction of such a tank would
help to relieve some of the unemploy-
ment in the town.

**UNEMPLOYMENT AND THE DE-
VELOPMENT OF WESTERN
CANADA'S COAL DEPOSITS**

Alberta coal, amounting to 87 per
cent of Canada's known supply, lies
dormant or only seasonally developed
to a very small extent. This coal can
be processed and the fuel shipped pro-
fitably to Ontario to successfully com-
pete with the Pennsylvania Anthracite,
for which millions of Canadian dol-
lars go to the United States annually.

The chief by-product of processed
coal is gas, such as is used by Henry
Ford in his great manufacturing plant
in preference to all other fuels.

Years ago a small gas flow at Pel-
ican Rapids in Northern Alberta caught
fire, wasting a few hundred cubic feet
per day. A tremendous outcry arose
against this criminal waste of a na-
tural resource and much money was
spent to stop the flow. Today, be-

tween two hundred million and three
hundred million cubic feet of natural
gas is being burned to get rid of it
every twenty-four hours in Alberta.
This gas makes the best of fuel for
power development; the supply seems
inexhaustible, but should it ever cease
the gas power plants could without
alteration use the gas product of coal.

Unavoidable seasonal unemploy-
ment under the present conditions is a
serious problem in Alberta. To solve
this unemployment the solution is to
ignore the vast coal deposits which,
when developed to by-production in
France, Belgium and Germany, create
busy manufacturing centres around
the coal fields, utilizing the by-pro-
duct gas in all forms of manufacture
and incidentally employs many men
permanently, not seasonally. A solu-
tion is also to let this natural gas go
to waste.

The much lauded conservation of
natural resources should be named
"conservation" of natural resources,
as they are only talking about it.

But listen to the real, final, and con-
sidered solution of our wise one. Lake
Minnewanka is to be raised 30 feet
for water storage purposes, employ-
ing, it is true, many men during con-
struction, but not many more men
than would be needed to erect a steam
by-product power plant burning gas
either from the plant or utilizing that
now going to waste in the oil fields.

Think this out for yourselves. When
once the storage dam is built is the
seasonal unemployment condition solv-
ed? Not at all. One man once a fort-
night can motor up from some other
plant and do all that is necessary in
an hour to regulate the flow. Quite a
difference, is it not, from the busy
manufacturing centre which would
spring up around the coal by-product
plant.

Are hydro plants or steam plants
the more economical? The cheapest
power development of all is a steam
plant in the lignite fields of Illinois
under conditions very similar to those
existing now in Alberta coal fields.
Steam plants can be built up unit by
unit as the market expands, while
hydro plants usually have develop-
ment capacities far beyond their mar-
ket, and the overhead expense on this
unsold product (and many of them are
only about 25 per cent efficient) brings
many of them into liquidation, which
with their watered stock and heavy
promotion and propaganda expenses
has landed many large hydro electric
plants developing over 600,000 h.p. and
costing over \$125,000,000, in the hands
of the receiver.

What then is the reason why the
coal fields are to be dormant and the
natural gas only a grand bonfire, while
the lake which was the cause of Can-
ada's first National Park must be
scenically spoiled by hydro develop-

ment?

There are two reasons. First, the
fear of strikes and labour trouble if
power was developed by steam; so
they avoid the strikes by not employ-
ing any man—obviously a very poor
solution of the seasonal unemployment
problem. Second, the dividend paying
properties of the Ontario Hydro and
the B. C. Electric have made Cana-
dian hydro bonds popular with the in-
vesting public, and on this popularity
it is easy to finance hydro.

Many years ago conditions in a cer-
tain country in North-western Europe
were very similar to those in Canada
today. Many natural resources were
either dormant or only partially devel-
oped—chiefly for the benefit of the
few and often to the obvious detriment
of the country. Many politicians squab-
bled for their own advancement till
a statesman named Bismarck was plac-
ed at the helm of the ship of state.
Then the Fatherland and not the in-
dividual became the aim. Natural re-
sources were not promoted but devel-
oped to give the greatest benefit
to all and on this policy Germany
became great in commerce and indus-
try; the trade mark "Made in Ger-
many" spread and continued to spread
all over the world.

A similar national policy today has
made France, of all other nations in
these times of financial depression, the
one country which suffers the least
from unemployment.

Will Canada progress best if gov-
erned for the benefit of the individual,
the class, or for all Canadians? Shall
we emulate the proved success of the
policy of Germany and France, or shall
we consider ourselves vastly superior
to all foreigners and hold unemploy-
ment insurance. If the former, there
is obviously no need to chop off the
Lake Minnewanka area from the Banff
Park. By developing our vast coal
fields, everything that can be done or
manufactured by hydro produced power
can also be done or manufactured
by steam and probably at less cost,
but in addition many by-products of
coal now imported can then be man-
ufactured in Alberta for both home and
foreign consumption.

If we are in favor of unemployment
parades and the dole, perhaps the old
fur traders were right when they cal-
led Canada the "Great Lone Land,"
for even to parade a man must eat,
and to eat he must have work.

Police in Berlin, Germany, are now
equipped with a "gas" patrol. The wea-
pon discharges a "bullet" which spreads
a cloud of gas, rendering the victim
unconscious but otherwise unhurt.

BILL TO AMEND THE CUSTOMS ACT PASSES HOUSE

Ottawa, Ont.—The bill to amend the Customs Act in respect to dumping received third reading in the Commons, after a lengthy debate. It went on to the Senate. The bill extends penalties to imported manufactured goods as well as imported natural products dumped into Canada, and makes the wholesalers' and jobbers' prices in the country of origin the basis for deciding whether they are fair, instead of the manufacturers' prices.

The bill met with a great deal of opposition on the ground that it gave the Minister of National Revenue wide powers in regard to tariff impositions. Final protests were made by J. S. Woodsworth (Labor, Winnipeg North Centre), E. J. Young (Liberal, Weyburn), and John Vallance (Liberal, North Battleford). Hon. E. B. Ryckman, Minister of National Revenue, was piloting the bill through the House, and defended the measure.

Mr. Woodsworth, in resuming the debate, protested against what he believed to be an attempt upon the part of the government to "rush through the House" a measure that should be carefully studied both by the House and by the public before it was dealt with. There should be time given to the public for an expression of opinion on such a "reactionary measure."

The prime minister had stated that he would remain in Canada rather than go to the Imperial Conference, if the present session was not ended in time to enable him to attend. It might be possible, said Mr. Woodsworth, that the Imperial Conference could get along without Mr. Bennett.

He did not agree with those who thought that the people "should take their medicine," for once this legislation was on the statute books it would be difficult to get it off again. The government was violating the right of parliament to protest against taxation.

The legislation before the House was intended to prevent a decline of commodity prices, said Mr. Young. The whole trouble with the country at present was that prices of other commodities had not declined along with farm products. This had reduced the purchasing power of the farmers and the only way to restore prosperity was to increase purchasing power. This could not be done unless commodity prices came down for there was no way of increasing farm prices.

Mr. Vallance declared the government's proposals regarding tariff affected every industry but one, agriculture. The farmers, he said, had to be content with promises.

Hon. E. B. Ryckman, Minister of National Revenue, in a brief statement before the close of the debate, said the principle of the bill had been approved by parliament in 1922 and not until today had any protests been made. He believed it was necessary to the government's program to deal with the unemployment situation.

The bill was then given third reading.

Heavy Grain Shipments

1,771,000 Bushels Of Grain Loaded In One Day On C.P.R. Lines

Winnipeg, Man.—From farm granaries east, west, north and south, over the net work of Canadian Pacific western lines on Tuesday, September 16, there poured into freight cars 1,771,000 bushels of grain for transit, an increase of nearly 200,000 bushels over the previous day, Manitoba district showing the greatest advance for that period. The report from J. G. Sutherland, superintendent of transportation, shows 1,079 cars inspected and 891 cars loaded.

Fine weather has facilitated the movement of grain with a consequent increase in storage in country elevators, at the head of the lakes and at the Pacific Coast.

Totals for the day indicate that marketing took 404,000 bushels from Manitoba; 609,000 from Saskatchewan, and 758,000 from Alberta.

W. N. U. 1856

May Stop Importation Of Russian Goods

Tariff Action Against Soviet Country Held Likely

Ottawa, Ont.—Importation of goods into Canada from Russia, believed to apply particularly to coal, may be stopped by order-in-council if an amendment to the Customs Act introduced in the House of Commons by Premier Bennett becomes law. The government proposed the insertion of a new section in the Act which will empower the governor-in-council to prohibit the importation of any goods from any country not a party to the Treaty of Versailles.

That the government had Russia in mind in framing the section was indicated by the premier in the House, later, although he did not mention that country. He said there had been much discussion in the country about imports from "certain countries where the whole population is engaged in the production of goods under the direction of the government."

Russia is not a party to the Treaty of Versailles under which certain obligations are imposed on governments to see that hours of labor and rates of wages conform to a certain standard.

Pan-American Air Congress Is Planned

To Be Held In Montevideo, Uruguay, Next February

Washington, D.C.—The first Pan-American Air Congress is to be held at Montevideo, Uruguay, in February, 1931, according to information just released by the Aeronautics Trade Division of the United States Department of Commerce.

It is expected that nations of both Americas will exhibit aircraft at the congress, and much valuable information on aircraft construction is expected to be interchanged.

The Salon Exposition will run from February 1 to 20, and will include displays of planes, motors, equipment, materials, armament and aerial transportation. Military, transport and sport plane display will be arranged.

Canada Has Retired From League Council

Not Eligible For Re-Election For Next Three Years

Geneva, Switzerland.—The Irish Free State replaced the Dominion of Canada as a member of the council of the League of Nations. There were three retiring members of the council, namely, Cuba, Canada and Finland, and Guatemala, Norway and the Irish Free State were chosen to fill the vacancies.

Canada will not be eligible for re-election to the council until three years have expired.

Train Crash Proves Fatal

Brakeman Killed When Grain Trains Collide Near Sioux Lookout

Sioux Lookout.—One trainman was killed and another injured when two Canadian National Railway grain trains, en route to the Head of the Lakes, collided in the McIntosh yards, 80 miles east of here.

Leslie White, a brakeman, was instantly killed when struck by grain car trucks, which were hurled through the air, while Joseph Hunter, another brakeman, suffered a broken leg. Grain cars were piled up along the right-of-way and one of the engines was thrown clear of the tracks.

French Wheat Crops Poor

Should Estimate Be Correct Imports Will Be Heavy

New York.—The New York Times publishes the following special cable from Paris:

"The wheat crop in France this season will be so poor as to constitute a disaster, according to estimates made by Delphin Destombe, statistician of the Bourse de Commerce, who places the total crop at 56,500,000 quintals. Should this estimate prove accurate, France will be obliged to import 20,000,000 quintals to supply her needs."

The Anglo-Egyptian Sudan has an intensive good roads campaign.

ACROSS CANADA BY AUTO

Vernon Dynes, who in company with Dick Merry, both of Oakville, Ont., have set out in an attempt to cross the continent in record time by automobile.

British Cattle Men Alarmed

Canada Applies For Extension Of Quality Mark On Meat

London, England.—Canada's plan to make a mass attack on the British meat market and her official application for an extension of the national mark—the quality sign now reserved for home meat—to cattle exported from the Dominion ready for killing in Britain, is causing alarm among English and Scottish cattle farmers, according to the Daily Herald.

The seriousness of the situation is receiving the consideration of the National Farmers' Union. The national mark for beef has caused British housewives to insist upon British meat and has resulted in a higher standard of quality. Old Country farmers have been forced to produce a higher grade of cattle and they have benefitted substantially by the national mark privilege.

It is understood that the Canadian demand for the privilege of using this mark is based upon the fact that Irish cattle are already included, and the dealers who receive Canadian cattle are anxious for it to be extended to them.

The Daily Herald regards the Canadian attack on the British meat market as a blow to Lord Beaverbrook because it disproves his argument to British farmers that imports from Canada will not affect them.

Bootlegging Of Grain

Manitoba Wheat Pool Takes Measures To Stop Practice

Winnipeg, Man.—Active campaign against the "bootlegging" of grain by members of the Manitoba Wheat Pool continues, and now nearly four score actions are pending in the courts.

This week Pool officials have secured 13 interim injunctions against members who are alleged to have sold their grain to non-pool buyers. The Pool is claiming damages for non-delivery of the crop of its members, and at the same time is asking injunctions to prevent further "bootlegging."

Aid To War Veterans

In This Connection, Canada Takes Second Place To No Nation In the World

Winnipeg, Man.—In aiding her great war veterans, Canada took second place to no nation in the world, Col. W. C. H. Wood, president of the Army and Navy Veterans in Canada, asserted in an address to assembled delegates at the association's annual convention here. Banded together as they were in Canada, veterans had every chance of receiving generous treatment from the Dominion Government. Trend of legislation, Col. Wood added, seemed favorable to the returned man.

Referring to the world-wide movement for peace, Lieut.-Col. G. A. Wells, of Winnipeg, speaking at memorial services this afternoon, expressed the hope that the memory of those who sacrificed their lives in the war would not fade. Dead heroes of the conflict might be forgotten, he thought, in the driving endeavor to remove all traces of war.

Banks In Manitoba Will Assist Farmers

Are Acting On Suggestions Made By Premier Bracken

Winnipeg, Man.—Banks in Canada have already put into effect, to a considerable extent, suggestions made by Premier John Bracken for relief of farmers oppressed by adverse conditions now existing in the grain market. This is the statement of Premier Bracken. Representatives of the banks and of the Manitoba Government held a conference at the Legislative Building.

The Premier stated that the parley was held for the purposes of developing the market for the province's barley crop, improving the market for livestock and lessening, if possible, the number of workmen leaving the farms for the cities, where they might add to the ranks of the unemployed.

Ontario By-Elections

Elections Will Be Held In Nine Constituencies On October 29

Toronto, Ont.—By-elections will be held in nine Ontario Legislature constituencies on October 29, following nominations October 18, it was announced recently, following a meeting of the provincial cabinet. These by-elections are necessitated by vacancies caused by the death or resignation of members and the changes made recently in the administration.

The constituencies affected are Waterloo South, Nipissing, Lanark South, Perth South, Algoma, Peel, York South, Brantford and Renfrew North.

Australian Flyer Killed

Sydney, N.S.W.—David Smith, one of the Australian airmen who made an unsuccessful attempt to fly to England in April, was killed when his machine hurtled earthward after his engine failed at an altitude of 150 feet. Smith jumped or fell into a garden and was picked up dead.

MANITOBA ASKS FOR \$2,000,000 TO PROVIDE WORK

Winnipeg, Man.—Two million dollars for Manitoba. This will be the plea of Premier John Bracken when he journeys to Ottawa next week to ask for his province a share in the \$20,000,000 voted in the House of Commons for relief of unemployment in Canada. The Premier announced his "quota" with representatives of 60 urban, suburban and rural municipalities.

The session at the legislative building was the second of a series of four meetings to be held within a week. Premier Bracken conferred with representatives of the banks asking and receiving assurance of every effort to assist farmers worried by low livestock and grain values.

The selection of the undertakings which the Dominion would be asked to construct was a matter solely for the provincial government, declared Mr. Bracken. The cabinet will make its decision before he leaves for Ottawa. Completion of the Mafeking cut-off on the Canadian National Railway to the Pas and development of the Riding Mountain National Park will be requested, the premier mentioned.

During the six-hour discussion, it was stated that the unemployment situation in Manitoba was more grave than in most of the other provinces. Bridge and subway programs were pressed for by delegates from Winnipeg and St. Boniface. All projects would be given consideration in the government's proposal to the Dominion, the premier promised.

Winnipeg and the suburbs have difficulties which must be met separately from those of the rural delegates, the premier mentioned. In view of this fact, he announced that he will hold two sub-conferences before he leaves for the east. He will meet suburban and urban delegates and will confer with the executive of the municipal union on the agricultural situation.

At the opening of the conference, Premier Bracken stated that the government was prepared to increase its unemployment relief contribution from one-quarter to one-third of the project-costs, to parallel the one-third offered by the Dominion; to pay one-third—and possibly one-half—of the excess cost of winter unemployment relief work; and to pay 50 per cent. of interest charges on capital cost of work prematurely undertaken.

It was revealed that the city of Winnipeg has prepared a program of subway and bridge construction costing approximately \$7,000,000, which it would submit to the Dominion Government as part of the plan to relieve the jobless, providing the provincial administration would bear its share in construction costs.

Good Roads Association

Officers Are Elected At Annual Meeting Held In Quebec

Quebec, Que.—Hon. J. E. Perrault, Minister of Highways and Mines, of the province of Quebec, was unanimously chosen as the next president of the Canadian Good Roads Association at the annual meeting here.

Hon. N. S. Lougheed, Minister of Public Works of British Columbia, is first vice-president; Hon. A. C. Stewart, Minister of Highways of Saskatchewan, second vice-president; and Hon. W. R. Hibbs, Minister of Public Works of Newfoundland, third vice-president.

George McNamee, of Montreal, was re-elected secretary-treasurer, while 19 directors from all sections of Canada were also chosen.

Arctic Winter Sets In

Natives Preparing For Long Siege In Land Of Midnight Sun

Point Barrow, Alaska.—Two inches of snowfall and dropping off in temperature brought the first touch of winter. Ponds and lagoons are frozen, the ice pack is gradually closing up all the open water in the Arctic ocean.

The Hudson's Bay steamer "Bay-chimo," the last boat south for the year, left on the 11th. The natives are preparing for the long siege of the Arctic winter.

Game to the Finish!

When the talk is of game fish, the above picture of a typical Great Northern Pike, hooked at French River, Ontario, speaks for itself. Visitors and sportsmen from the four corners of the earth pour into French River Bungalow Camp each summer, over Canadian Pacific Railway lines, to holiday, golf, fish, swim and canoe under the guidance of Jack Strathdee, camp manager, who delights in showing neophytes where and how to land the big fellows. The above is a fair specimen of what luck may be expected. Game fish? Just wait till you play one!

CHAPTER XXX.—Continued.

"You'll never have to leave the old house, Grandma darling," she was saying tenderly. "Thanks to this blessed Jim it's ours forever and ever, amen."

Grandma looked up at Jim, then back at Charmian. She did not say that with some strange sixth sense she had known when they left her that Charmian was on her way to sign the deed. It had been a bitter hour for Grandma, waiting there in silence with her memories; and now she asked, not seeing the way quite clearly: "You mean, dearie, that you've sold the house to Jim?"

The young man came closer, smiling down upon her.

"That wasn't necessary, Grandma. Can't you guess why?"

His eyes met Charmian's in a glance that needed no interpretation, and Grandma cried: "You mean she—she's taken you, Jimmy? She's really taken you?"

Jim laughed, softly.

"Incredible as it seems—she has!"

"And you're not doing it just for me, dearie?" Grandma's wrinkled face bore a strange mingling of joy and fear. "That wouldn't be fair to Jimmy, Charmian. He deserves the best. You mustn't cheat him even to keep my heart from aching. You're not doing it just to get the house?"

"No," said Charmian, as seriously as a little girl would answer the important question of some elder, "I'm doing it to get the man. I'd marry him, Grandma, if we had to live in one of those old freight cars on the siding. I've been a long time knowing my own heart. I don't

DO YOU SUFFER FROM CONSTIPATION?

Countless remedies are advertised for constipation. Many relieve for the moment but they are habit forming and must be continued. Others contain calomel and dangerous mineral drugs, which remain in the system, settle in the joints and cause aches and pains. Some are harsh purgatives which cramp and gripe and leave a depressed after effect. Avoid lubricating oils which only grease the intestines and encourage nature's machinery to become lazy. A purely vegetable laxative such as Carter's Little Liver Pills, gently touches the liver, bile starts to flow, the bowels move gently, the intestines are thoroughly cleansed and constipation poisons pass away. The stomach, liver and bowels are now active and the system enjoys a real tonic effect. All druggists 25c and 75c red pkgs.

W. N. U. 1856

wonder you doubt me. I shouldn't blame Jim for doubting either; but—but I'm not cheating him, Grandma. I'm giving him—everything I have to give."

Jim cleared his throat, and asked, to save Grandma from the tears he knew were imminent: "Have you forgotten my reputation as a shrewd business man? Why, Grandma Davis! I'm swapping myself for a wife, a house, and a grandmother—and you ask if I'm getting the bad end of a bargain, I'm surprised!"

The words were light, but his husky voice betrayed him; and in another moment he raised Charmian to her feet and kissed her, a kiss that said far more than words to the old lady who gazed up at them.

"Well!" she declared, drawing a deep breath of happiness, "I don't think I was ever so glad but twice before—the day Father told me he loved me, and the night they put my baby in my arms. I'd borne two others that didn't live, you know, and I just couldn't believe that this one was all right. And he grew up to be Charmian's father! Come here, children, and kiss me, both of you. I feel sort of like singing or saying my prayers. I don't know which."

There followed a joyful dinner. John Carter stopped in as they were sitting down, and Charmian insisted that he stay. She told him the good news and he kissed her again, "right under Jimmy's nose," as Grandma said, but without the devastating effects of the day before.

It was the doctor who helped the old lady back to her chair by the window, and who, when she spoke of his own happiness, said quietly: "Will you forgive me for not telling you before? You see, Grandma, it was all so horribly uncertain. If it hadn't been for Charmian I believe I'd have blown up! She was a trump to let me use her as a safety valve, and I'll never forget it. If she and my best girl aren't bosom friends at sight it will break my heart. But they will be. I'm sure of it; and now Jim Bennett knows I'm not a danger-point there ought to be some happy days ahead—for all of us."

Grandma chuckled.

"Well, sonny, if I'd been Charmian you would have been a danger-point, so I can't blame Jim for seeing you through green eyes. There've been times when I've been all mixed up in my mind wondering which of you I wanted for a grandson. I've even wished that Charmian was a sort of female Brigham Young, so she could marry both of you!"

Later, while she dozed peacefully in her chair, Grandma was conscious at intervals that Charmian and Jim were ransacking the house, "planning what they'll do to it most likely," she mused happily, and dozed again. Not till she was rested and ready for whatever the afternoon might have in store for her, did they go out to send some telegrams and call on Aunt Salina and the Merrys.

"I going to send a message to my mother, and one to Aunt Sophie at the same time," announced Jim, grinning. "I'd give a dollar to see their faces when those telegrams arrive, and if Charmian wishes to spread the glad tidings further—"

"Look here," Grandma reproved him, "you mustn't start in being extravagant the first thing."

Jim laughed at her fears.

"What are a few telegrams at a time like this?" he replied magnificently. "Let me be reckless, Grandma, before I settle down into the state of matrimony," and Grandma couldn't suppress a smile.

"Can I tell Lizzie Baker if she drops in?" she asked as they were leaving.

"You may tell the world!" responded Jim with pride; and by the aid of the old mirror Grandma saw him kiss his Charmian again.

She drew close to the window then, watching them go down the street, and wondering a bit why they stopped so long looking at the law office where she had expected to end her days. She could not hear Charmian say whimsically: "I shan't live in you after all, little house. Are you sorry, I wonder?"

"It ought to be heartbroken," said Jim.

"It would make a beautiful playhouse," said Charmian. "I always thought it should be a playhouse."

"With Towser and Mouser to guard the door it would be a peach of a playhouse," agreed Jim. "Uncle George suggested that we sell it and have it moved away; but I guess we'll hold onto it—for future use!"

"Oh, Jim!" breathed Charmian, and squeezed his hand in the face and

Cascarets

"THEY WORK WHILE YOU SLEEP"

eyes of Lizzie Baker who was hanging a pair of stockings on the line.

Indeed, something in the attitude of the young people so aroused Miss Lizzie's curiosity that she dropped in on Grandma almost immediately, forgetting to take a measuring cup for the molasses she wished to borrow.

"Dear me suz!" she exclaimed when Grandma divulged the news. "I knew the minute I laid eyes on 'em that something was in the air. You tell Charmian that she can count on me to hem all her linen. I wouldn't offer if I didn't know that there's nobody in Wickfield can do it any better if I do say it that shouldn't. And to think that you're going to stay right here! It takes a load off my mind. It would have been more than flesh and blood could bear to see strangers livin' in the old Davis house, it would so. Dear me suz! there goes Luella and the deacon. Maybe they've made it up again. Do you mind if I run 'round and tell the Merrys? I dunno any one in town that'll be gladder about everything than them."

Only one other caller had appeared and that was the Merrys' Gypsy, who walked in the screen door that Miss Lizzie had carelessly left open, and deposited a dilapidated shoe at Grandma's feet, "for all the world," chuckled the old lady, "as if he knew we were going to have a wedding! I always said that Gypsy was a smart dog."

Now it was twilight, and a peaceful silence pervaded the old house. Main Street had grown quiet, and soon the neighbors would be going home after the day's work. What hadn't she seen from this window? Grandma was thinking. She, closed her eyes, visualizing the pageantry of life that had passed before her: Babies carried proudly by on their way to christening. . . . Older babies trudging sturdily to school on frosty mornings. . . . Neighbors going about their daily tasks, yet stopped to wave a greeting as they passed. . . . Young lovers strolling beneath the elms in enchanted moonlight; and friends like the old doctor borne tenderly to their resting places on a green hillside. . . . Life! . . . That was what Grandma had seen from her shop window.

"Dear Lord, I thank Thee that I have lived to see this day," she murmured. And after a silence: "I was foolish to worry. Here I've been all stirred up thinking we'd got to leave the house where Father brought me as a bride—fretting about Charmian—wondering what she'd do when my call came and she'd be left alone. And then, right out of a clear sky, everything's all right! Charmian's babies will be born where she was born, and her father and grandfather before her. . . . And I needn't worry about leaving her when I cross the

FROM MOTHER OF EIGHTEEN

Read How This Medicine Helps Her

Cardston, Alberta—"I am fifty-eight years old and the mother of eighteen living children. We live on a farm and I am a very healthy mother considering that I have such a big family to work for. The druggist first told me about Lydia E. Pinkham's Vegetable Compound and I have depended on it for many years. When I had this picture taken, the photographer was telling me about his wife's ailments and after I told him about the Vegetable Compound he went to the drug store and bought her two bottles."—MRS. BERTHA SALLENBACH, SE., Cardston, Alberta.

When I had this picture taken, the photographer was telling me about his wife's ailments and after I told him about the Vegetable Compound he went to the drug store and bought her two bottles."—MRS. BERTHA SALLENBACH, SE., Cardston, Alberta.

bar—not with Jimmy to dry her tears. Come to think of it, I ought to be ashamed to have had such doubts in a world where things mostly come out right. Why, I've been so down-hearted it didn't seem hardly worth the trouble to live at all, except for Charmian; but now—" Grandma smiled happily at the thought, "now I declare I want to live enough longer so when I meet Father in Kingdom Come, I can tell him I've held our great-grandchild in my arms!"

THE END.

Exact Centre Of England

Lies In Warwickshire, But Exact Spot Not Certain

Where is the exact centre of England? Leamington folk say an ancient evergreen oak in the borough marks it, but Warwick says the real tree is one at Coten End in that far more ancient town, writes a holiday expert in "Tit-Bits." Nevertheless, there is a well-known stone at Meriden, between Coventry and Birmingham, which also boldly claims to mark the real centre. One thing only seems certain—the centre lies in Warwickshire.

Minard's Liniment for Cuts and Abrasions.

Wool Warehouses Remain Open

Arrangements Made For Benefit Of Saskatchewan Sheep Men

In order to accommodate Saskatchewan sheep men who have been delayed in the shipment of 1930 wool because of the early harvest this year, the wool warehouses at Regina and Portage la Prairie will remain open until November 1st, according to announcement by W. W. Thompson, manager of the Canadian Co-operative Wool Growers' Association in Western Canada. Ordinarily the warehouses would close August 31st.

When Asthma Comes do not despair. Turn at once to the help effective—Dr. J. D. Kellogg's Asthma Remedy. This wonderful remedy will give you the aid you need so sorely. Choking ceases, breathing becomes natural and without effort. Others, thousands of them, have suffered as you suffer but have wisely turned to this famous remedy and ceased to suffer. Get a package this very day.

Playground Of the World

Switzerland, which lays claim to the proud title "The Playground of the World," has in all about 3,600 hotels, whose total invested capital is approximately \$3,000,000,000. An army of 61,000 persons is employed to look after the needs and comforts of the travellers from all parts of the globe who patronize these 3,600 hotels.

The Oil For the Farmer.—A bottle of Dr. Thomas' Electric Oil in the farm house will save many a journey for the doctor. It is not only good for the children when taken with colds and croup, and for the mature who suffer from pains and aches, but there are directions for its use on sick cattle. There should always be a bottle of it in the house.

Bright Future For Gliders

Gliding from block to block to visit neighbors will be a popular form of transportation, replacing short automobile trips within 10 years, according to Howard Flanders, former secretary of the British Gliding Association. He predicts that gliders will be as common then as the very popular motorcycle is now in England.

Quick Action saves trouble, worry. Keep Douglas' Egyptian Liniment always handy. Stops bleeding instantly. Cauterizes wounds. Hair comes back. No scar remains.

Record Of World's Shipping

The new 1930-1931 edition of Lloyd's Register of Shipping includes a full record of about 83,000 steamers, motorships and sailing vessels of 100 gross tons and over that are owned by the various maritime nations of the world.

Worms in children, if they be not attended to, cause convulsions, and often death. Mother Graves' Worm Exterminator will protect the children from these distressing afflictions.

A centenarian of Glasgow attributes his great age to the fact that for the first 70 years of his life there were no motor cars and for the last 30 he has been confined to the house.

Minard's Liniment is a household friend.

BACKACHE

Wonderful relief from pain

Backache is one of those wearying complaints which bind all their victims together with a common bond of misery. And when any one suffers from backache finds a sure remedy, fellowship prompts the quick report of that discovery to others. Here's a woman who has her friend to thank for knowledge of a remarkably successful treatment. Now gratitude compels her, in turn, to pass along the good news to you.

"I am writing to tell you of the great benefit I have received from Kruschen Salts. My friend, Mrs. H., had received so much benefit that she begged me to give Kruschen a trial, although at first I was doubtful, because I had tried so many things. At last, however, I tried some of her Kruschen, and, feeling hopeful, I purchased a bottle, and I can honestly say that before I had finished the bottle my backache was gone. I have suffered for years with kidney trouble and dreadful headaches, and now to be free from the pain altogether is wonderful."—(Mrs. C.)

A Wonderful Instrument

Heart beats and the sound of breathing have been sent from South America to Spain by a new instrument so clearly that doctors in Madrid have been able to diagnose the diseases of patients 6,750 miles away in Buenos Aires.

Changing Weather

affects your health if you are not protected. Minard's prevents cold and gripe; relieves rheumatism and stiff joints.

MINARD'S

"KING OF PAIN"

LINIMENT

Practical Farming

British Royalty and peers are extensive landowners in Canada. The Duke of Sutherland has the greatest number of acres, with Earl Minto, the Prince of Wales, Lord Cheylesmore and others, following, and practical farming is practiced on all their holdings.

Restless CHILDREN

CHILDREN will fret, often for no apparent reason. But there's always Castoria! Harmless as the recipe on the wrapper; mild and bland as it tastes. But its gentle action soothes a youngster more surely than a more powerful medicine.

That's the beauty of this special children's remedy! It may be given the tiniest infant—as often as there is need. In cases of colic, diarrhea or similar disturbance, it is invaluable. A coated tongue calls for just a few drops to ward off constipation; so does any suggestion of bad breath. Whenever children don't eat well, don't rest well, or have any little upset—this pure vegetable preparation is usually all that's needed.

Fletcher's CASTORIA

CONSTIPATION ENDED BY FRUIT-A-TIVES

writes Mrs. W. Walker. Thousands say constipation, indigestion, gas end overnight with "Fruit-a-tives". Complexion clears like magic. Nerves, heart quiet. Get "Fruit-a-tives" from druggist today.

TOWN & COUNTY Personalographs

Mr. and Mrs. G. Tighe and family of Didsbury were visiting at the home of Mr. and Mrs. H. N. Elliott on Sunday.

J. J. Greenan was a business visitor to the city for a couple of days last week.

Alex Anderson of Drumheller was a business visitor to Carbon over the week end and enjoyed a round of golf on the local links on Sunday.

Mr. and Mrs. T. J. Ramsay and family are moving from the island to the house formerly occupied by the H. A. English family.

W. A. Braisher was a Calgary visitor last week.

Jas. Gilbert has practically completed the job of painting the exterior of C. H. Nash's store.

The first sign of snow this fall appeared on Tuesday and the weather was cold and wet for a day or so. Considerable moisture fell in some parts of the district and harvesting was delayed for a couple of days throughout Alberta.

A number of the Carbon young folks attended the dance at Kelvers Lake on Friday night last.

Isidor Guttman of the Carbon Trading Company left on Monday to attend the religious exercises in connection with the Jewish New Year. During his absence Mrs. Arthur Neher has been looking after the business interests of the Carbon Trading Company.

Wm. Smith of the Imperial Building Supplies, was a Calgary visitor last week.

The Carbon Tennis Club are holding their third annual Banquet in the dining room of the Carbon Hotel on Tuesday, September 30th, at 8 p.m. Get your ticket now from one of the committee.

Mr. and Mrs. A. F. McKibbin and daughter motored to Champion on Sunday.

A continuance of the list of prize winners in the Carbon school fair was to have appeared in this issue of The Chronicle, but no copy was received by the publisher.

In the changes announced in the time table of the C.P.R., the local train will leave Calgary at 7.15 a.m. and arrive at Knee Hill at 5.30. Returning, it will leave Knee Hill at 7.30 a.m. and arrive in Calgary at 5.25 p.m.

Rally Services will be held in the

UNFAIR REFLECTION ON THE CANADIAN PRESS

The prime minister has impugned the press of Canada as inaccurate and, in instances which he did not specify, deliberate in misrepresentation. The premier is wrong in his estimate and unwise in his reflection upon the press, an honorable institution.

Mr. Bennett has characterized the Calgary newspaper reports of his address in this city an nonsense. The Herald, by employing trained verbatim shorthand writers, independent of its staff, reported Mr. Bennett exactly as he spoke. The Herald will be quite prepared to sustain before the public Carbon United Church on Sunday next.

The prime minister appears to think that speaking over the radio is more satisfactory to politicians than newspaper reports of what was stated. The fact is that a newspaper report, if honestly written, as practically all newspaper reports are written on either side of politics, is a written record, while the radio talk vanishes into the ether, leaving no direct responsibility.

The Herald does not trouble on its own behalf to debate with the prime minister the accuracy of its report of anything he may have said within the radius of its influence, but it does object to what it regards as an unfair reflection upon the press of Canada, which as a whole has conducted controversial politics on a fairer basis than the politicians.—Calgary Herald.

Carbon United Church on Sunday next, September 28th. Sunday School and church will be held together in the evening at 7.30 p.m. and all parents and children are asked to attend. A special program is being arranged on this occasion.

The first dance to be held in Carbon for a couple of months will take place in the Elks hall on Friday (tomorrow) night. The Swallow five-piece orchestra has been engaged to furnish the music and it is anticipated that there will be a record crowd present on this occasion.

A number of the members from the Wayne Golf Club paid a friendly visit to the Carbon club last Sunday and some very close and interesting matches were played. There were eight men and three ladies here from Wayne and four players were present from Drumheller. The visitors expressed themselves as having a very enjoyable

day on the Carbon golf links and they have promised to arrange a return game this fall.

ON TIME

Now that the school calls at nine o'clock every morning, in many a home both city and country, there is a grand and glorious scramble and rush to get the children off on time.

Some boys and girls never do acquire that most valuable of habits—punctuality—and they go through life trying to catch up and never getting there. Looking at lateness from the point of view of the teacher and the classroom, it is one of the unpleasant and unpardonable annoyances that take the joy out of the day.

Looking at it from a health standpoint the child with his breakfast bolted and his appetite unsatisfied, makes a poor pupil. He starts the day handicapped.

The remedy is simple and holds the secret of a life's success. Examine a set of rules of the health game of the Junior Red Cross and it will be seen that one refers to sleeping. Going to bed on time is the key to the situation of being on time at school. This is too valuable a habit to be ignored. Let every mother have a set of health rules in the home. Write for your free copy to the Junior Red Cross, Civic Block, Edmonton.

Who Does Your Printing?

All business houses need more or less printed matter, all of which is within the possibilities of the local printer. Yet how prone many are to pass up the home printer and let the orders go to city offices which have no interest whatever in rural communities except to get printing orders and the cash to pay for them. Business men, remember that the home paper is constantly promoting the interests of the home community and you owe it to yourself and your local paper to back up these efforts by at least having your printed matter done locally.
